

SMART Notebook basic Tutorial

Click on any type of object and the dashed border should appear.

To edit text, have the arrow tool selected () and double click on the text you want to edit.

To Import images, click the **insert** drop-down menu at the top, and click **Picture File...**, drop down menu to **Whs on 'Stv3' (L:)** then open the **Teachers** folder then open the **ppapulis** folder then open the **Picture Folder**, You may use those pictures today in your experimentation.

Save your file in **your** drive.

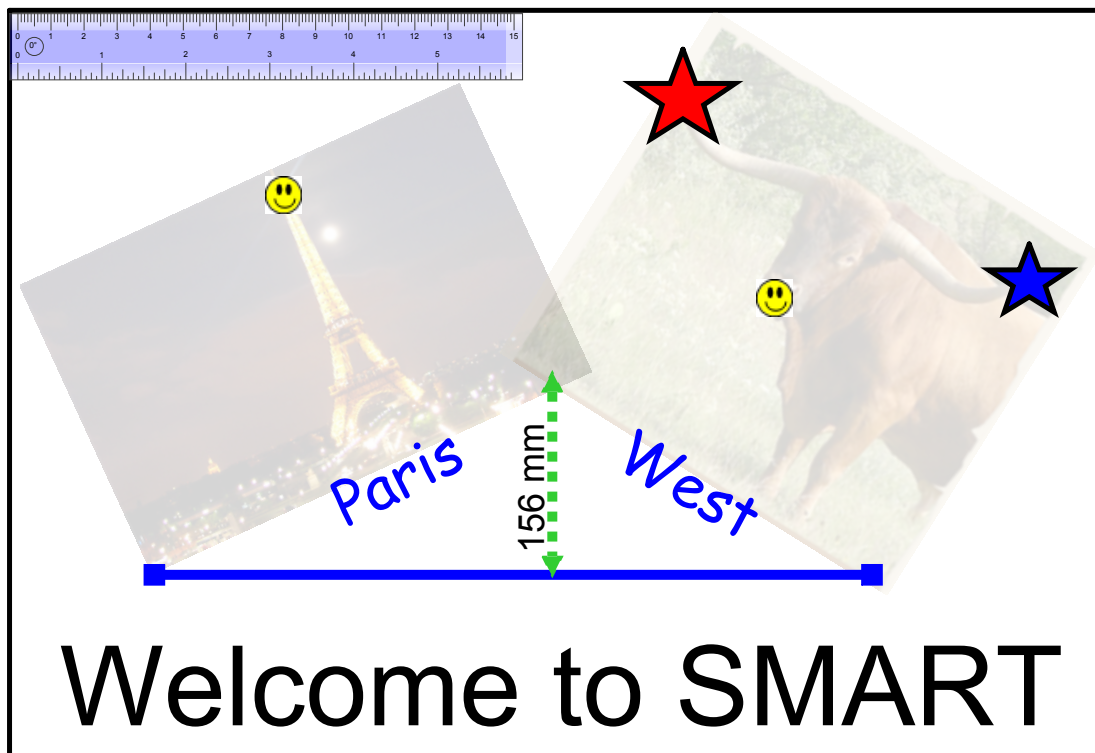

Name the file "(your class hour) (last name)"
ex. 6 Papulis.notebook

SAVE OFTEN

Your assignment is on the back →

Assignment

1. Re-create the following image.

2. Create your own image by experimentation.
- This should be made in a new page, **not** new file
 - Be creative
 - Be appropriate
